Attn: F. Lockhart

ROUTINE DATA SUBMITTALS (1242) - JMK-0039-91

Ref: M. Hestmark Itr, 8HWM-FF, to F. Lockhart, Data Submittal, March 18, 1991

This letter is in response to the above referenced letter from the Environmental Protection Agency (EPA), dated March 18, 1991, to DOE requesting submittal of environmental monitoring data, in electronic format, on a routine basis. The data to be submitted will include all geochemical, geologic, and hydrologic information acquired from environmental monitoring and restoration studies undertaken at Rocky Flats Plant and which is input into the RFEDS database system.

The EPA letter requested a specific format for chemical data for Operable Units (OU) i and 2. The data requested had been previously transmitted to EPA in the specified format, but apparently could not be read by EPA's computers. A duplicate copy of this information was provided on March 28, 1991, to Mr. Bill Monson of the EPA.

Should you have any additional questions please contact M. B. Arndt, of the Environmental Monitoring and Assessment Division, at extension 4294.
